Karen - the addresses for the homeowners are in the COA's that I have sent you a couple of times. If you did not retain it - the COA can actually be found on the internet! The reason there are 19 people and 18 supplies is that 2 families share a single supply - **Ex. 6 - Personal Privacy** Please be aware that Ron Carter Jr. is deceased.

No problem - I'll try to track down all the information you need tomorrow since you have some flexibility. If the addresses are not included along with the analytical data, I may not have them, but I am sure someone in the NWRO will be able to help me assemble that information as their staff have made a number of field visits to the homeowners. I've indicated which addresses are provided along with the analytical data summaries in your list below and also which home well had biogenic methane - apparently that is not the reason for the discrepancy.

Thanks Seth! - Tomorrow or even early next week is fine...
Here are the Names you sent me so far- I don't have any addresses

Ex. 6 - Personal Privacy

Thanks!

Hi Karen,

I am happy to hear that the information I sent thus far has been beneficial. I am not in the office today, but Gene Pine may be able to assist you and I have cc'd him on this email. The number of homeowners involved that sticks in my head is 19, but I am fairly new to the case and I know at least one of the home wells has biogenic, not thermogenic, methane, and that is possibly the reason for the discrepancy. If you provide Gene with the names and addresses I sent you yesterday, he can cross-reference it with the Cabot report I have on my desk and figure out which homeowner may be missing. Once he figures that out, he can provide you with a name and address. When I get in tomorrow I will look for any lab data summaries I might have for the homeowner that was not included. I apologize, as I thought I was looking in the correct location for all of the analytical data I had in my possession. If you need anything besides a name and address before tomorrow morning, please call my cell at Ex. 6 - Personal Privacy and I will figure out a way we can get it to you before COB today. Thanks - Seth.

Seth- We have conflicting numbers of homes included. One letter says 18 another says 19....do you have the names and addresses of all the residences included in the order? Thanks for all the information you've already sent!!!!
